The electric refrigerated three-wheeler (electric refrigerated tricycle) includes a refrigeration unit, insulated box, and electric tricycle. Customers can choose to buy the unit or box separately and install them on their own tricycles.

## Solution 1: Electric Refrigerated Three-Wheeler

**Tricycle Refrigeration Unit**

- “
- Voltage: DC48V / DC60V / DC72V
  - Temperature Range: -30°C to +25°C
  - Energy-efficient DC inverter compressor
  - No fuel required; 100% battery-driven
  - Low maintenance, strong anti-vibration, tilt-resistant
- ”

**Refrigerated Box**

- “
- Material: Color steel or CFRT skin + 75mm PU foam insulation
  - Optional finishes: FRP or stainless steel skin
  - Volume: from 970L to 1800L depending on model
  - Customizable size based on vehicle type
- ”

The electric refrigerated two-wheeler (electric refrigerated bike) consists of an electric bike and an integrated refrigeration box. Customers can purchase the box separately and mount it on their own bike for the final 1 km of temperature-controlled delivery.

## Solution 1: Electric Refrigerated Two-Wheeler

“

- Driven Type: Fully electric driven
- Voltage Options:  
DC12V/24V/DC48V/DC60V/DC72V
- Temperature Range: -30 ° C to +25 ° C  
(adjustable based on use case)
- Cooling Box Material: Color steel or CFRT  
composite + 75mm PU insulation foam
- Application: Ideal for frozen food, fresh  
vegetables, milk, meat, seafood, and ice cream

”
